# Olalaye Blessing

[github.com/Olaleye-Blessing](https://github.com/Olaleye-Blessing)

[www.blessingolaleye.xyz](http://www.blessingolaleye.xyz)

## EDUCATION

---

BS in Mathematics (in progress)

University of Lagos

December 2018-June 2022

## PROFESSIONAL EXPERIENCE

---

Solace Imaging (<https://solaceimaging.com>)

Jan 2022 - present

- Worked on improving the UI and consuming the needed APIs for dynamic web experiences.
- Updated, improved, and encouraged the use of right semantic tags, thereby improving the site's accessibility.
- **Technologies used:** React.js, Redux, Typescript, assorted CSS/Component Libraries.

Web 2 & 3 contract (NDA signed)

Feb 2022 - April 2022

- Contributed components and web pages related to OAuth, including login, signup, reset, forgot password flows.
- Contributed towards design and implementation of main dashboard & core functionality
- Integrated MetaMask & Chrome web3 Ethereum APIs for address resolution, transaction creation.
- **Technologies used:** Next.js, Typescript, Tailwind CSS, MetaMask

## OPEN-SOURCE EXPERIENCE

---

ParetOS (<https://paret0.com>)

- Contributed multiple pull-requests to open-source project
  - [Removed unnecessary overflow](#) - This removed all unnecessary scrollbars on some sections and pages that could make the overall UI unattractive. I was able to work with MUI library.
  - [Split one large file into different components](#) - I made sure a large file was split into different reusable components.
  - [Fix UI and semantics](#) - I improved the accessibility by using correct HTML tags and the data/UI shown when some data are available..
- Hired by maintainer for freelance work, created collection for [Nigeria](#) & West Africa in the Library of Context

## Full-Stack Web Development Portfolio

- [Oshere](https://oshere.blessingolaleye.xyz) (<https://oshere.blessingolaleye.xyz>)
  - Next.js based generated static website, aggregating TV series & movies, integrating with external REST API.
  - OAuth-based authentication, 'Sign-in with Google' for account creation.
  - Profile information & preferences stored on Firebase, styled with SCSS and Tailwind
- [NCov](https://covidtracker-umber.vercel.app) (<https://covidtracker-umber.vercel.app>)
  - Visualize Covid-related statistics from different countries.
  - Bookmark and compare statistics they are interested in.
  - React.js application, with Next.js and Tailwind CSS.
- [Cryptus](https://cryptus-nine.vercel.app) (<https://cryptus-nine.vercel.app>)
  - Cryptus integrates with APIs ([coinranking1.p.rapidapi.com](https://coinranking1.p.rapidapi.com), [bing-news-search1.p.rapidapi.com](https://bing-news-search1.p.rapidapi.com)) to provide basic information about crypto coins, crypto news, popular exchanges websites, and NFTs.
  - Built with SCSS, Tailwind Css, Next.js, and TypeScript.
