

# Olaleye Blessing

Frontend Developer

## 👤 About Me

From the moment I loaded my first 'Hello World'-HTML file in Chrome, I knew I'd be interested in diving into the world of Web development. What started with 'Hello World' has become a full fledged-passion that only get more exciting as the months go by. Below, you will find some of my projects I've done that showcase my skills, passion and commitment to the world of web development.

## 📁 Projects

December 2020 — Present

Listed below are some of my projects

### [Muvus](#)

Muvus is a media project that lists some series of movies, tv series and people. All media have a set of community(chat forum) that could be created by any authenticated user.

Users can also search for a particular media.

[source code](#)

### [nCov](#)

nCov gives short covid information of countries, continents and the world in general. It is a 5-page project in which one of the pages compare data

Users can also save any compared data

[source code](#)

### [Cryptus](#)

Cryptus provides basic information about popular coins in the world, latest crypto news, popular exchanges website and NFTS.

Users can filter out coins and check coin's history in form of a simple graph.
