EDUCATION

BS in Mathematics (in progress)   University of Lagos   December 2018-June 2022

PROFESSIONAL EXPERIENCE

Solace Imaging (https://solaceimaging.com)   Jan 2022 – present

– Worked on improving the UI and consuming the needed APIs for dynamic web experiences.

– Updated, improved, and encouraged the use of right semantic tags, thereby improving the site's accessibility.

– **Technologies used**: React.js,Redux, Typescript, assorted CSS/Component Libraries.

Web 2 & 3 contract (NDA signed)   Feb 2022 – April 2022

– Contributed components and web pages related to OAuth, including login, signup, reset, forgot password flows.

– Contributed towards design and implementation of main dashboard & core functionality

– Integrated MetaMask & Chrome web3 Ethereum APIs for address resolution, transaction creation.

– **Technologies used**: Next.js, Typescript, Tailwind CSS, MetaMask

OPEN-SOURCE EXPERIENCE

ParetOS (https://paret0.com)

- Contributed multiple pull-requests to open-source project
    - Removed unnecessary overflow – This removed all unnecessary scrollbars on some sections and pages that could make the overall UI unattractive. I was able to work with MUI library.
    - Split one large file into different components – I made sure a large file was split into different reusable components.
    - Fix UI and semantics – I improved the accessibility by using correct HTML tags and the data/UI shown when some data are available..
- Hired by maintainer for freelance work, created collection for Nigeria & West Africa in the Library of Context

Full-Stack Web Development Portfolio

- **Muvus** (https://muvus.herokuapp.com)

    – Next.js based generated static website, aggregating TV series & movies, integrating with external REST API.

    – OAuth-based authentication, 'Sign-in with Google' for account creation.

    – Profile information & preferences stored on Firebase, styled with SCSS and Tailwind

- **NCov** (https://covidtracker-umber.vercel.app)

    – Visualize Covid-related statistics from different countries.

    – Bookmark and compare statistics they are interested in.

    – React.js application, with Next.js and Tailwind CSS.

- **Cryptus** (https://cryptus-nine.vercel.app)

    – Cryptus integrates with APIs (coinranking1.p.rapidapi.com, bing-news-search1.p.rapidapi.com) to provide basic information about crypto coins, crypto news, popular exchanges websites, and NFTs.

    – Built with SCSS, Tailwind Css, Next.js, and TypeScript.
